FGM Consultants is a registered training organisation with a principal objective of generating opportunities for structured entry level training and education for the meat and food processing sectors.

Complementing its 2013 National Meat Industry Training Provider of the Year and 2012 Victorian Government Small Training Provider of the Year accolades, Baw Baw's Business and Professional Services Award is further acknowledgment of FGM as a provider of excellence and endorses its strategies of locating its operations in close proximity to its many Gippsland clients.

Notwithstanding its local residency, since establishing in 1996, FGM now operates nationally and internationally, with completed projects in countries such as Jordan, Egypt, Samoa and Malaysia.

By maintaining a strategic focus on the meat and food sectors and delivering intensified training that responds to today's needs, FGM is positioned as a supplier of choice, resulting in its client numbers being up 25% on last year and a four year average annual growth in enrolled trainees of 27%.

FGM Consultants

WINNER - Services - Business and Professional

Michael Grogan of FGM Consultants with Jenny Hardy of Services - Business and Professional Award Sponsor, Federation Training.

Ten-Rose International Simmental

WINNER - Agribusiness Award

From left: Di Carson and Hannah Wardell, Award Judges, Chris and Sharon Jordan of Ten-Rose International Simmental and Heather Noonan of Agribusiness Award Sponsor, Commonwealth Bank.

Owned by Chris and Sharon Jordan, fifth generation cattle farmers.

Ten-Rose International Simmental is a cattle operation breeding the three types of Simmental. Traditional bulls that can go into beef or dairy operations known as (Dual Purpose).

Full Red Poll bulls that can go into Beef Operations.

Full Black Poll bulls that can go into Beef Operations.

We also supply AI straws of Simmental semen and embryos. Sold in Australia and on an international basis.

We fly bulls out from Tullamarine so they are not on the plane for any long period of time.

The Stud offers free advise on all facets of cattle and pasture management. Specific tours for Simmental.

Fleckvieh, Holstein, Angus, Hereford and Shorthorn breeders arranged. With the surge of interest from current Holstein farmers, we can advise on suitable bulls and AI requirements.

A special feature of the

breed is the selection of high genomic DNA bulls used at Stud. This means Beef Quality with Tenderness. Cattle are able to turn off at an earlier age with more cover

that includes Tenderness.

Another feature of our cattle is the poll factor. Bulls, females, heifers, embryos and Simmental semen available. 7 Days per week service.
